

Data Flow Diagram

Date	15 July 2026
Team ID	
Project Name	Book A Doctor
Maximum Marks	2 Marks

Data Flow Diagram Table

S.No	Component	Example in Project	Purpose
1	External Entities	Patient, Doctor, Hospital Admin, Payment Gateway	Send/receive data from the system
2	Processes	Appointment Booking, Schedule Management, Payment Processing, Notification Service	Transform input into useful output
3	Data Stores	Patient Database, Doctor Schedule Database, Transaction Records	Store patient info, doctor schedules, and payments
4	Data Flows	Appointment Request, Confirmation, Payment Details, Notifications	Movement of data between entities, processes, and stores

Diagram Flow (Level-0 Context)

1. **Patient → Appointment Request → Booking Process**
 - a. Patient submits booking request.
 - b. System validates and checks doctor availability.
2. **Booking Process → Doctor Schedule Database → Doctor**
 - a. Doctor receives updated schedule.

b. Prevents double bookings.

3. Payment Gateway → Transaction Records → Admin

a. Payment processed securely.

b. Admin monitors financial records.

4. Notification Service → SMS/Email → Patient & Doctor

a. Patient receives confirmation.

b. Doctor gets appointment reminder.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram
