

Problem-Solution Fit

Date	15 July 2026
Team ID	
Project Name	Book A Doctor – Online Appointment System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas: Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience.

1. CUSTOMER SEGMENT (CS) Patients seeking quick doctor appointments, doctors managing schedules, and hospital administrators handling bookings.	6. CUSTOMER LIMITATIONS (CL) Limited digital literacy, budget constraints, and use of low-end mobile devices.	5. AVAILABLE SOLUTIONS – PROS & CONS (AS) Existing hospital apps and manual booking systems. Pros: Basic appointment features. Cons: Limited doctor info, poor UI, no reminders, lack of integration.
2. PROBLEMS / PAINS (PR) Long waiting times, manual appointment booking, lack of doctor availability info, missed appointments. (Occurs frequently in urban and semi-urban areas.)	9. PROBLEM ROOT / CAUSE (RC) Manual scheduling, poor communication between patients and hospitals, lack of centralized data.	7. BEHAVIOR & INTENSITY (BE) High urgency when sick; moderate engagement for routine check-ups.
3. TRIGGERS TO ACT (TR) Need for faster healthcare access, convenience of online booking, and digital payment options.	10. YOUR SOLUTION (SL) Book A Doctor — a web and mobile platform enabling patients to book appointments online, view doctor availability, receive reminders, and make secure payments.	8. CHANNELS OF BEHAVIOR (CH) Online: Website, mobile app, SMS reminders. Offline: Hospital reception desk, phone calls.
4. EMOTIONS BEFORE / AFTER (EM) Before: Frustration, anxiety, wasted time. After: Relief, satisfaction, trust in system.
