

Project Initialization and Planning Phase

Date	15 July 2026
Team ID	BD-001
Project Title	Book A Doctor – Online Appointment System
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) Report

The proposal aims to transform the hospital appointment process using digital technology, boosting efficiency and patient satisfaction. It tackles manual booking inefficiencies, promising better operations, reduced waiting times, and happier patients. Key features include an online booking platform, doctor availability tracking, and automated reminders.

Project Overview	
Objective	To revolutionize the doctor appointment process by implementing a web and mobile platform that ensures faster, more reliable, and patient-friendly scheduling.
Scope	The project covers patients, doctors, and hospital administrators, providing a centralized system for booking, managing schedules, and handling payments securely.

Problem Statement	
Description	Manual appointment booking leads to long queues, missed appointments, and poor communication between patients and hospitals.
Impact	Solving these issues will result in improved hospital efficiency, reduced patient frustration, and enhanced healthcare accessibility.

Proposed Solution	
Approach	Develop a centralized online appointment system using modern web technologies, integrating notifications and secure payments.
Key Features	- Online doctor search and booking - Real-time schedule updates - SMS/email reminders - Secure payment gateway - Admin dashboard for hospital management

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware		
Computing Resources	Cloud hosting	AWS EC2
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	500 GB SSD
Software		
Frameworks	Web frameworks	React.js (Frontend), Node.js + Express (Backend)
Libraries	Additional libraries	MongoDB, Twilio API, Google Maps API
Development Environment	IDE / Tools	VS Code, Postman
Data		

Data	Source, size, format	Hospital patient records, doctor schedules, JSON/CSV formats
