Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/book-a-doctor
Programming Language(s)	JavaScript (Node.js, React.js), HTML, CSS
Framework(s) Used	Node.js + Express (Backend), React.js (Frontend), MongoDB Atlas (Database)
Key Features Implemented	Patient registration/login, doctor search & booking, schedule management, SMS/email reminders, secure payments, admin dashboard
Pending / Incomplete Features	Multi-language support, telemedicine video consultation
Setup / Run Instructions	Clone repo → npm install in backend & frontend → configure .env → run backend (npm start) → run frontend (npm run dev) → open http://localhost:3000

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
