Project Name	Book A Doctor
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I want to book a doctor easily.” • “Waiting in hospital queues wastes my time.” • “I need to know which doctor is available.”	Patient / User <i>(Role / User Type)</i>	THINKS • “Online booking would save time and effort.” • “I should be able to see doctor ratings and timings.” • “My health data should be secure.”
DOES • Searches for doctors online. • Visits hospitals manually for appointments. • Calls reception to check availability.		FEELS • Frustrated with long waiting times. • Worried about missing appointments. Relieved when booking is confirmed online.
